

Simon Hochmuth

Consultant | Data Science & Analytics | TS/SCI Cleared

simon.hochmuth@gmail.com | 301-789-7215 | [LinkedIn](#) | Website: simonhochmuth.com

SUMMARY OF QUALIFICATIONS

Data analytics consultant with 5+ years of experience building predictive models, automated pipelines, and dashboards to support financial planning and operational strategy. Skilled in Python, SQL, and delivering insights for executive decision-making.

PROFESSIONAL EXPERIENCE

LMI

Senior Consultant | Financial Strategy & Data Science

Washington, DC
Mar 2023 – Present

- Designed scenario modeling tools and dashboards for CFO team's five-year budget planning—enabling executive visibility into financial and workforce impacts across a multi-billion-dollar enterprise portfolio.
- Modernized a legacy .NET app by building a Python automation pipeline unifying SQL data, Excel sheets, and 100+ contract PDFs—automating email and report generation for 150+ stakeholders and reducing repetitive weekly coordination time.
- Automated responses to 200+ recurring ad hoc data requests by developing a reusable SQL/Python pipeline and Streamlit app—eliminating 30%+ of repeat inquiries and streamlining stakeholder engagement across finance and HR teams.
- Architected a scalable analytics workflow for a 1,000+ person workforce, driving dynamic filtering, population-adjusted growth metrics, and forecasting models aligned to institutional milestones (e.g., raise dates, hire cycles)—giving decision makers clear insight into subgroup trends and expected organizational shifts.
- Conducted feature analysis and implemented validation techniques to bolster data quality, ensuring reporting accuracy and consistency across critical financial architecture critical for congressional reporting and watchdog audits.

Booz Allen Hamilton

Associate Consultant | Logistics, Data Science, & Analytics

The Pentagon, VA
July 2021 – Mar 2023

- Structured and deployed scalable ETL pipelines for millions of logistics records, driving time-series analysis to improve strategic planning, incident response, and operational visibility. Deployed high-integrity solutions using AWS, Databricks, Spark, and Python.
- Engineered supply chain risk models to project inventory readiness across hundreds of critical items using growth and depletion KPIs—supporting flagging of shortages before threshold breaches and escalating risks directly to executives.
- Led design and rollout of eight mission-critical insight dashboards for Joint Staff, empowering real-time operational visibility and data-driven decision-making across supply chain and readiness functions. Secured leadership buy-in through stakeholder engagement, driving adoption across senior DoD stakeholders.

CACI International

Consultant | Data Science & Analytics

Bethesda, MD
July 2020 - July 2021

- Delivered integrated analytics solutions for the Navy, transforming raw vehicle maintenance data into structured insights—unlocking pattern recognition across fleet performance and supporting a foundation for predictive readiness modeling.
- Launched interactive dashboards and case studies using Python, Tableau, and SQL to surface hidden trends and anomalies in operational data—empowering clients to apply predictive analytics and automation strategies based on exploratory findings.

AgustaWestland

Flight Control Software Engineer

Philadelphia, PA
June 2018 - July 2020

- Engineered flight control system requirements, led test planning, and analyzed time-series aircraft data to validate safety, assess performance, and evaluate software changes through data-driven simulations during 4 helicopter production cycles.

EDUCATION

University of Maryland, Global Campus – M.S. Data Analytics

May 2024

- Relevant Coursework:** Decision Systems, Data Visualization, Machine Learning, Predictive Modeling, Big Data Analytics

University of Maryland, College Park – B.S. Aerospace Engineering

May 2018

TECHNICAL SKILLS

Stakeholder Engagement, Strategy Development, Project Scoping, Executive Presentations, Agile Delivery, Python, R, SQL, Tableau, Power BI, Qlik, PySpark, Databricks, Forecasting, Machine Learning, Data Visualization, C#, Git, Plotly, Time Series Forecasting, K-Means, Decision Tree, SARIMA, Random Forest, Keras, Tensorflow, NoSQL, KNN, Regression, Deep Learning
